

TSHEPO SEKETE

Software Developer | Cloud Engineer

Johannesburg, South Africa • (078) 717 2792 • tshepotubatsi@gmail.com

Portfolio: tshepo1000.github.io/portfolio • LinkedIn: linkedin.com/in/tshepo-sekete-154094157

PROFESSIONAL SUMMARY

Full-stack developer who bridges frontend, backend, and infrastructure work end to end — from untangling deep CSS specificity bugs in production Angular apps to leading Flutter mobile development and administering Azure/Linux hosting environments. Comfortable owning a problem from stakeholder requirement through to a verified, shipped fix. Holds multiple industry certifications spanning Microsoft Azure, Oracle Cloud Infrastructure, and CompTIA Security+.

CORE SKILLS

- Frontend & UI Engineering: CSS theming systems & design tokens, Angular component styling, responsive design, accessibility/contrast auditing, micro-interactions & motion design
- Web & Application Development: HTML5, CSS, Tailwind CSS, JavaScript (ES6), PHP, Node.js, Express.js, REST APIs, MySQL schema design, Java, C#, Python
- Mobile: Flutter (Android & iOS)
- Cloud & Infrastructure: Microsoft Azure (web apps, storage, networking, RBAC), Linux fundamentals, DNS administration, SSL/TLS deployment
- Dev & Hosting Platforms: cPanel/WHM, Plesk, WHMCS (billing & automation), Git/GitHub, WordPress (Divi), Figma, Canva, SharePoint, Power Automate
- Cybersecurity & Governance: CompTIA Security+ knowledge domains, Zero Trust concepts, server hardening, SPF/DKIM/DMARC
- Other: Bash CLI, requirements gathering, client support & ticket resolution, technical documentation

CERTIFICATIONS

- Microsoft Certified: Azure Developer Associate
- Microsoft Certified: Azure AI Engineer Associate
- Microsoft Certified: Azure Fundamentals
- Microsoft Certified: Azure Data Fundamentals
- Microsoft Certified: Power Platform Fundamentals
- CompTIA Security+
- Oracle Cloud Infrastructure 2023 Certified Architect Associate
- Oracle Certified Associate: Java SE 8 Programmer
- Oracle Certified Professional: Generative AI
- Cisco NDG Linux Unhatched

PROFESSIONAL EXPERIENCE

Developer | Vukela Connect

August 2026 – Present

- Leading a brand-driven color scheme and UX redesign across 8+ views (Home, Projects, Portfolios, Task Board) of the company's Angular workspace dashboard, translating brand assets into a single systemized CSS custom-property theme.
- Audited and resolved deep CSS specificity conflicts across a large legacy Angular codebase — completing important rules, component-scoped styles, and multiple accent-variable namespaces — replacing them with one maintainable source of truth for theming.
- Diagnosed and fixed accessibility contrast bugs app-wide using a computed-contrast audit script, and implemented custom micro-interactions and hover animations following motion-design best practice, gated behind reduced-motion accessibility settings.
- Set up and customized a self-hosted Zabbix network monitoring server (Docker, PostgreSQL, Nginx), co-developing the Zabbix PHP frontend (PHP, JavaScript, HTML, CSS).
- Leading a small team of 2–3 developers building a companion Zabbix mobile app (Flutter, Android & iOS) that will give roughly a dozen field technicians real-time network monitoring on the go.

- Built and maintained responsive client and internal websites, including order journeys for fibre, LTE, and VoIP services; implemented automated CI/CD pipelines (GitHub → cPanel) that cut manual deployment effort and improved release reliability.
- Deployed and managed Azure resources (web apps, storage, networking) with role-based secure access and naming standards; configured DNS zones and SSL/TLS certificates across 25+ domains.
- Implemented and administered WHMCS for client onboarding, billing, and provisioning — restructured overdue invoice reminder logic, tuned payment capture timing, and resolved recurring MySQL/PHP configuration issues.
- Built a SharePoint intranet site for internal company use and automated internal workflows with Power Automate.
- Performed server hardening and DNS security practices (SPF, DKIM, DMARC); provided Tier 1/2 technical support achieving a 95% issue resolution rate.

- Annotated and evaluated ML training datasets, applying data labeling standards and quality/ethical review guidelines.

EDUCATION

- Diploma in Information Technology — University of South Africa (UNISA), Jan 2025 – Present
- National Certificate: IT Systems Development (NQF 5) — Dynamic DNA, Jan 2022 – Feb 2024
- Cloud Computing Technical Training — Mecer Inter-Ed, Jun 2024 – Dec 2024
- Cybersecurity Mentorship Program — Dynamic DNA, Jan 2023 – Dec 2023
